SK10
Brassia Earth

SK11
Bitchy Violet

SK12
Smokey Ash

SK13
Scabiosa Black

SK14
Blood Burgundy

USER INSTRUCTION

Thank you for purchasing DIVA Kandy.

Please read this instruction manual carefully before use and enjoy our newly shiny light-resistant color.

Ordinary Kandy colors and most of imported ones are mostly made out of dye, and are generally said to be paints that are prone to color fading.

However, Diva Kandy was developed to minimize color fading by using the pigments. In general, pigments have large particles, so they are considered good concealing paints, but diva Kandy, developed by our company, is a Kandy color made possible by a technology that crushes pigments into dye particles (NANO particles).

1. Perform surface treatment. Lightly rub the surface with commercially available sandpapers.
2. Paint coarse base color like silver. (We recommend the SHOW UP base color Cosmic Silver Micro Bottle to be used)
3. After painting the base color, paint Diva Kandy.
 - * Please dilute 100% with our micro bottle thinner.
 - * Please take an interval of 3 to 5 minutes each coat.
 - * Please finish when the desired color is achieved. The more times you apply it, the deeper the color develops.
4. Finish with topcoat clear.

Divya Kandy over the plating paint:

1. Apply Terra Krome (**Please use Show Up Terra Krome series for the best result**)

Terra Krome → <https://www.showup.jp/terraE.html>

Terra Krome Perfect Kit → <https://www.showup.jp/TerraPkE.html>

2. Dry and wait until Terra Krome is completely cured.
3. Paint desired Divya Kandy color on top of Terra Krome
*DO NOT PAINT THICKLY at once, but paint thinly and evenly until becomes your desired color.
4. Apply topcoat clear to finish.

PRECAUTION

Get medical attention immediately, in case of feeling sick, ill, unwell while using the product. Promptly wash eyes with plenty of water if inhaled or get in the eyes. Get medical help if irritation continues. Wear protective clothes such as masks, protective gloves and avoid inhaling the vapor for a long time. Keep the product in the cool place in order to avoid fire hazard.
