

Quick Primer

Special Fast Drying Primer for hobby paint

Contents: 50g

【Features】

It is a quick-drying primer that can strongly adhere to various paints such as polystyrene, polycarbonate, vinyl chloride, ABS, iron, aluminum.

How to use:

1. Thoroughly remove oil, mold release agent, dirt and dust before applying.
2. Coat 1~2 times thinly and evenly.
3. Dry for about 5 minutes in summer and 15 minutes in winter before proceeding with the painting process.

Precautions:

Completely remove oil, mold release agent, dirt and dust before applying.

If you apply too much at once, it will cause the plastic material to melt.

Thick coating can cause delamination and cause paint peeling.
