

KROMA EDGE™

— BEYOND REFLECTION —

Conventional Paint: Loses Its Mirror Finish After Clear Coat
KROMA EDGE: Stays Clear After Clear

Conventional Chrome-Effect Paint

Conventional chrome-effect paints are one-component systems. Because the metallic particles become mixed with the resin and solvents, they lose their alignment and settle, resulting in reduced reflectivity and a cloudy appearance. Metallic particles are unevenly distributed, causing unstable color development.

KROMA EDGE

KROMA EDGE is a two-component system. The metallic particles cure at the surface layer, preventing them from mixing with the resin and solvents of the topcoat clear. As a result, they do not settle, allowing the coating to maintain its high reflectivity. Metallic particles align uniformly, delivering superior reflective performance.

The Next-Generation Chrome-Effect Coating Powered by Self-Organization Technology

Utilizing advanced Self-Organization Technology, KROMA EDGE enables metallic particles to rise to the coating surface and align uniformly, creating an unprecedented mirror-like reflection and deep metallic luster through paint alone.

Design × Technology × Sustainability × Creativity

- * Automotive & Motorcycle Applications
Achieve brilliance beyond conventional chrome finishes and unlock new possibilities in custom paint.
 - * Architecture & Interior Design
Reproduce the depth, weight, and premium appearance of real metal on virtually any shape or material.
 - * Industrial Applications
Suitable for functional coatings requiring high reflectivity and enhanced durability.
 - * Hobby & Craft Applications
Ideal for scale models, figures, and artistic creations, delivering a true chrome-like finish with professional quality.
- A revolutionary technology that creates a mirror-like surface simply by painting. This is the innovation of KROMA EDGE — a self-organizing chrome-effect coating system.

■ KROMA EDGE

◆ Small Set

Total Contents: 140g / **Coverage Approx. 0.5 m²**
Mirror Seed Formula: 20g
Binder: 50g Hardener: 20g Thinner: 50g

◆ Medium Set

Total Contents: 420g / **Coverage Approx. 1.5 m²**
Mirror Seed Formula: 60g
Binder: 150g Hardener: 60g Thinner: 150g

◆ Ultra Large Set

Total Contents: 10,080g / **Coverage Approx. 32 m²**
Mirror Seed Formula: 1,440g
Binder: 3,600g Hardener: 1,440g Thinner: 3,600g

■ KROMA EDGE REDUCER SLOW

KROMA EDGE Reducer Slow is a dedicated reducer designed to support high-temperature applications and large-area spraying. It slows the evaporation rate under hot conditions, providing better control during application while helping to minimize pinholes and surface defects, resulting in a smoother, more consistent chrome-like finish. KROMA EDGE Reducer Slow is recommended for users who want to achieve the maximum performance of the KROMA EDGE system.

Available Sizes: 180 g / 0.9 Kg / 3.6 Kg

■ KROMA EDGE TOPCOAT CLEAR

◆ Topcoat Clear 180 Set

Total Contents: 378g / **Coverage Approx. 1.5 m²**
Clear Base: 180g Hardener: 18g Thinner: 180g

◆ Topcoat Clear 900 Set

Total Contents: 1,890g / **Coverage Approx. 6 m²**
Clear Base: 900g Hardener: 90g Thinner: 900g

◆ Topcoat Clear 3600 Set

Total Contents: 7,560g / **Coverage Approx. 24 m²**

Only the Real Shine

Stays Clear. After Clear.

THE REAL ONE

SHOW UP KROME Color Series Function

KROMA EDGE — BEYOND REFLECTION —	A revolutionary two-component chrome-effect coating unlike conventional paints. Curing the chrome layer significantly reduces cloudiness after clear coating. Suitable for a wide range of applications, from hobby projects to automotive parts.
TERRA push your limits	A chrome color formulated with indium pigments, offering brilliance comparable to Ag (silver) along with excellent weather resistance. Ideal for automotive exterior parts, building exteriors, and other demanding applications.
reAL krome	A high-brilliance chrome-effect paint formulated with aluminum pigments. Easy to apply even for beginners and suitable for a wide range of applications, from automotive to hobby projects.
sputter krome	A black chrome color formulated with chromium pigments. Creates a deep, substantial sputter-chrome finish on everything from small objects to automotive aluminum wheels.

Color will never peel off.

Super Cut Compound

Compounds Like No Other!

Developed using expertise and know-how gained from real-world automotive and motorcycle applications.

Polish

Effectively removes sanding marks from approximately 1500-grit paper and achieves a mirror-like finish in less time. Its excellent cutting power minimizes deep polishing scratches, making the final finishing process easier. Suitable for a wide range of clear coats, from hard urethane clears to softer lacquer clears.

Finish

Specially formulated abrasive particles quickly remove polishing marks and produce a brilliant, high-gloss finish in less time. Free from oil-based gloss enhancers, it brings out the surface's true natural gloss through polishing for a clean, professional finish.

Water

Formulated with abrasive particles of varying sizes and hardness to effectively remove 3000-grit sanding marks. When polishing plastic surfaces directly, sand any uneven areas or sink marks flat with approximately 3000-grit sandpaper, then polish with this compound to achieve an even higher level of mirror-like finish.

Water-Based Degreaser & Surface Preparation Cleaner

LPMG2 Low Pressure Micro Gun 2

Provides air pressure equivalent to an airbrush. Its low-pressure operation minimizes overspray and mist. Equipped with a 10cc cup designed specifically for hobby use and can be connected to your existing compressor.

Cup Capacity: 10cc
Nozzle Size: 0.6mm
Spraying Air Pressure: 0.03–0.08 MPa

Color Check Clear Card

Business card-sized Color Check Cards for test spraying and keeping color reference samples for all types of paints. Ideal for checking the final appearance of multi-layer finishes such as pearl and Kandy colors.

90mm x 55mm / 50 cards per pack.

2 sheets per set
Size per sheet: 30mm × 220mm
Thickness: 0.2mm

Signal Strobo/Splash Lines

For Automotive Use

Colors: Red × White / Blue × White
Size:
Strobe: 3,895 mm × 65 mm
Splash: 3,850 mm × 336 mm

Stencil Sheet

Paint stencil sheets ideal for custom design work on RC cars and other hobby projects. The flexible material conforms easily to curved surfaces, helping prevent lifting and paint bleed for cleaner, more precise results.

Size: 195 × 300 mm Thickness: 0.1 mm
Quantity: 5 sheets Material: PVC

SHOW UP Hobby Color Book

A comprehensive color catalog featuring essential colors for polycarbonate and hobby applications, including PC Binder Colors & Aerosols, ONE DROP KANDY, and other key SHOW UP colors—all in one convenient book. The perfect guide for color coordination and selecting the ideal color combination.
