

KROMA EDGE™

— BEYOND REFLECTION —

Stays Clear. After Clear.

Conventional Paint: Loses Its Mirror Finish After Clear Coat
KROMA EDGE: *Stays Clear After Clear*

Conventional Chrome-Effect Paint Conventional chrome-effect paints are one-component systems. Because the metallic particles become mixed with the resin and solvents, they lose their alignment and settle, resulting in reduced reflectivity and a cloudy appearance. Metallic particles are unevenly distributed, causing unstable color development.	<table><tr><th>Conventional Paint</th><th>KROMA EDGE</th></tr><tr><td></td><td></td></tr><tr><td>Uneven metal particles can cause cloudiness and inconsistent color development.</td><td>Uniformly aligned metal particles create a highly reflective, mirror-like finish.</td></tr></table> ■ Metallic Particle ● Resin and Other Particles	Conventional Paint	KROMA EDGE			Uneven metal particles can cause cloudiness and inconsistent color development.	Uniformly aligned metal particles create a highly reflective, mirror-like finish.	KROMA EDGE KROMA EDGE is a two-component system. The metallic particles cure at the surface layer, preventing them from mixing with the resin and solvents of the topcoat clear. As a result, they do not settle, allowing the coating to maintain its high reflectivity. Metallic particles align uniformly, delivering superior reflective performance.
Conventional Paint	KROMA EDGE							
Uneven metal particles can cause cloudiness and inconsistent color development.	Uniformly aligned metal particles create a highly reflective, mirror-like finish.							

The Next-Generation Chrome-Effect Coating Powered by Self-Organization Technology

Utilizing advanced Self-Organization Technology, KROMA EDGE enables metallic particles to rise to the coating surface and align uniformly, creating an unprecedented mirror-like reflection and deep metallic luster through paint alone.

Design × Technology × Sustainability × Creativity

- * Automotive & Motorcycle Applications
Achieve brilliance beyond conventional chrome finishes and unlock new possibilities in custom paint.
 - * Architecture & Interior Design
Reproduce the depth, weight, and premium appearance of real metal on virtually any shape or material.
 - * Industrial Applications
Suitable for functional coatings requiring high reflectivity and enhanced durability.
 - * Hobby & Craft Applications
Ideal for scale models, figures, and artistic creations, delivering a true chrome-like finish with professional quality.
- A revolutionary technology that creates a mirror-like surface simply by painting. This is the innovation of KROMA EDGE — a self-organizing chrome-effect coating system.

■ KROMA EDGE

◆ Small Set

Total Contents: 140g / **Coverage Approx. 0.5 m²**
Mirror Seed Formula: 20g
Binder: 50g Hardener: 20g Thinner: 50g

◆ Medium Set

Total Contents: 420g / **Coverage Approx. 1.5 m²**
Mirror Seed Formula: 60g
Binder: 150g Hardener: 60g Thinner: 150g

◆ Large Set

Total Contents: 1,260g / **Coverage Approx. 4.0 m²**
Mirror Seed Formula: 180g
Binder: 450g Hardener: 180g Thinner: 450g

◆ Extra Large Set

Total Contents: 2,520g / **Coverage Approx. 8 m²**
Mirror Seed Formula: 360g
Binder: 900g Hardener: 360g Thinner: 900g

◆ Ultra Large Set

Total Contents: 10,080g / **Coverage Approx. 32 m²**
Mirror Seed Formula: 1,440g
Binder: 3,600g Hardener: 1,440g Thinner: 3,600g

■ KROMA EDGE REDUCER SLOW

KROMA EDGE Reducer Slow is a dedicated reducer designed to support high-temperature applications and large-area spraying. It slows the evaporation rate under hot conditions, providing better control during application while helping to minimize pinholes and surface defects, resulting in a smoother, more consistent chrome-like finish. KROMA EDGE Reducer Slow is recommended for users who want to achieve the maximum performance of the KROMA EDGE system.

Available Sizes: 180 g / 0.9 Kg / 3.6 Kg

■ KROMA EDGE TOPCOAT CLEAR

◆ Topcoat Clear 180 Set

Total Contents: 378g / **Coverage Approx. 1.5 m²**
Clear Base: 180g Hardener: 18g Thinner: 180g

◆ Topcoat Clear 900 Set

Total Contents: 1,890g / **Coverage Approx. 6 m²**
Clear Base: 900g Hardener: 90g Thinner: 900g

◆ Topcoat Clear 3600 Set

Total Contents: 7,560g / **Coverage Approx. 24 m²**
Clear Base: 3,600g Hardener: 360g Thinner: 3,600g

THE REAL ONE

SHOW UP KROME Color Series Function

KROMA EDGE — BEYOND REFLECTION —	A revolutionary two-component chrome-effect coating unlike conventional paints. Curing the chrome layer significantly reduces cloudiness after clear coating. Suitable for a wide range of applications, from hobby projects to automotive parts.
TERRA push your limits	A chrome color formulated with indium pigments, offering brilliance comparable to Ag (silver) along with excellent weather resistance. Ideal for automotive exterior parts, building exteriors, and other demanding applications.
reAL krome	A high-brilliance chrome-effect paint formulated with aluminum pigments. Easy to apply even for beginners and suitable for a wide range of applications, from automotive to hobby projects.
sputter krome	A black chrome color formulated with chromium pigments. Creates a deep, substantial sputter-chrome finish on everything from small objects to automotive aluminum wheels.
